

Dr. John Holliday Curing Cancer in Dogs and How To Prevent The Flu in You

Did you know that 50% of dogs in the US will get Cancer at some stage of their life and many veterinarians and research indicates that for the most part this is due to what dogs are fed. Dogs are carnivores and evolved eating raw meats not discounted processed pack them high and sell them cheap processed irradiated glow in the dark canned dog foods or biscuits.

Tonight we talk live with Dr. John Holliday who is head of mycology research at Aloha Medicinals. An expert on immunology in people and animals we will talk about Flu's, pandemics and the best medicinal mushrooms to take now as prevention also. Aloha Medicinals are at the forefront of developing anti cancer supplements. So we will talk about why Dogs get cancer, what we can do to help manage pain and give our pets a better life and we will be taking your calls live so please phone us live on the number below.
